REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest a melt blowing head having a polymeric material inlet channel and a melt-blowing die with a plurality of holes; a geared displacement pump delivering material to two main channels having like shapes and size from which extends a channel arrangement for distributing the polymeric material from the inlet channel to each hole of the die; the channel arrangement having a tree construction extending from the polymeric material inlet channel and having a plurality of tree branches each of which ends at a respective hole of the die, each main channel having an end portion defining a knot and having two side branches extending therefrom, each of the side branches having the same L-shape and size, the L-shape having a vertical leg downward, the branches having end portions forming middle branches forming further knots therefrom further secondary side branches extend having an equal L-shape and size as those of the first and second branches, thereby to each hole of the melt-blowing die will correspond a like extruding path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

References of Interest

2. Zimmer (5,992,453), Nelson (3,619,859), Landoni (3,767,347), Shirai et al (5,783,129), Pipkin (4,387,124) and Zimmer et al (4,550,681) are cited of interest to show the state of the art.

While each of the above references teach a channel arrangement similar to the claimed apparatus, the prior art fails to teach or suggest the arrangement in combination with a melt blowing head and die.
